DETAILED ACTION

Claim Objections

1. Claim 18 is objected to because of the following informalities: it appears the words "Apices" in lines 3 and 5 of the claim should read --axis--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 recites the limitation "apices" in lines 3 and 5. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-5, 8-14 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by US 5,875,958 to Weiteder et al.

Weiteder shows a fitment attached to a perimeter of opening 10 on top wall 1A of container 1, seen in Fig. 1, having a flange with a upstanding walls 3 and 12 forming a pour conduit with a substantially ellipsoidal planar cross section with a minor portion above a major

portion, see Figs. 3B and 4, a tier away membrane 7 at the minor portion and including a pull ring 8, a hinged cap 4 integrally formed with the conduit and having an annular projection 9 with the same geometrical shape of the conduit. Ambient air ingresses into the container through the minor portion of the conduit as product is poured from the container.

Response to Arguments

6. Applicant's arguments with respect to claims 1-5 and 8-14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hedberg shows an opening arrangement. Bouraoui et al. shows an integrated closure.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
